

"A Passion for Excellence"

Wireless Security Watch

The award-winning watch literally puts peace of mind and comfort within arm's reach—providing homeowners with simple, single-button control of their security system, lights, garage doors and more!

Cutting-edge technology in the simplest, most user-friendly form imaginable. All the great features of a 5804 four-button wireless key are combined with the practicality and durability of a Timex™ digital watch. It's no longer necessary to carry a separate remote key fob; controlling the security system is always right at the user's fingertips. Simplified operation helps reduce false alarms.

The **5804 Wireless Security Watch** – by combining the ease of remote control with the practicality of a sporty Timex™ digital timepiece, the watch literally puts security and convenience within arm's reach. There are no codes to remember and no complicated procedures to learn—the push of a single button is all it takes to arm or disarm a security system.

With the appropriate peripherals, the 5804 Watch can be programmed to easily perform a multitude of security and home control functions automatically—such as arming the system in "Stay" mode, operating lights, appliances and garage doors. When used as a digital sports watch, the 5804 can function as an alarm clock and beep to remind the homeowner of important appointments. Users can even simultaneously clock the time to run a mile and the time it takes to run each lap.

Attractive and durable, the 5804 Watch is water resistant up to 10 meters, and features an INDIGLO™ Light for easy night-time viewing. Simplified operation helps reduce false alarms and training costs.

The 5804 Watch is the newest product member of ADEMCO's 5804 family of remote controls; which includes the 5804 keychain, the 5804 four-button remote control, the award-winning 5804BD remote with status feedback; and the popular 5804BDV Talking Bi-Directional Wireless Key—the handheld remote device that provides system status feedback in plain-spoken English. The Wireless Security Watch is compatible with ADEMCO's 5881ENL, 5881ENM, 5881ENH and 6150RF Wireless Receivers.
